

# SAFE CITY PLATFORM

## What is Safe City Platform?

Safe City Platform connects alerts from the BlackBox Digital Witness App and other devices (phase 2) such as Video doorbells, IP cameras and other alarm systems. Each alert is classified as a non-emergency or emergency alert. Emergency alerts are sent to participating Law Enforcement, 911/PSAP's, and local Neighborhood Watch Captains. Non-emergency alerts are sent to just the Neighborhood Watch Captains to review and compare with other reports, or share with the community.

## Benefits for HOA Communities

- Increased deterrence of suspicious persons on HOA grounds
- Reduction of liability as evidence recorded by the app or video doorbells can be used to determine actual fault
- Increased sense of community awareness
- Adds value to the HOA, Homeowners expect the HOA to lead the way in new security trends
- Increased visibility in common areas, leading to increased security
- Elevated level of accountability for on premise security officers
- Possible rise in property values as crime decreases
- Increased natural disaster readiness
- Any Board Member can use the application during a difficult encounter to increase safety
- Deterrence to graffiti and other property destruction
- Immediate notification of any 911 incidents on HOA grounds.

**Annual Software Cost- \$900/year per HOA Community  
(Licensing and Support)**
