

SAFE CITY PLATFORM

What is Safe City Platform?

Safe City Platform connects alerts from the BlackBox Digital Witness App and other devices (phase 2) such as Video doorbells, IP cameras and other alarm systems. Each alert is classified as a non-emergency or emergency alert. Emergency alerts are sent to participating Law Enforcement, 911/PSAP's, and local Neighborhood Watch Captains. Non-emergency alerts are sent to just the Neighborhood Watch Captains to review and compare with other reports, or share with the community.

911

Benefits for residents

- Reduction of crime
- Accountability of incidents in your Neighborhood Watch
- Discounted Video Doorbell
- Ability for Neighborhood Watch Captains to actively monitor potential issues
- Ability to send emergency videos with GPS pinpoint location to participating Law Enforcement and emergency services within seconds
- Can be used to locate injured neighbors for first aid during natural disasters
- Report animal abuse with video evidence
- Report suspicious behavior directly to Law Enforcement
- Peace of Mind

What about privacy?

- Law Enforcement cannot see your personal videos on your cellphone
- Law Enforcement can not see your doorbell videos
- Law Enforcement can see your videos recorded with BlackBox Digital Witness Mobile App
- Your privacy will always be protected. You may be asked to opt-in for certain programs
